

Trailer cover catalogue

E-series

When you want to make transporting items easy

Convenient from start to finish

HD-PE plastic makes our trailer covers lightweight and extremely durable. Our trailer covers also have a number of features that make them versatile, safe and very easy to use. The quick-release mechanism makes it quick and easy to attach and remove the trailer cover. For transporting very long loads, the front and rear walls of the trailer can be opened even when the trailer cover is mounted.

In normal use, the plastic trailer cover can withstand years of heavy use, regardless of the conditions.

Environmentally friendly

Our products are 100% recyclable, so they do not cause an adverse impact on the environment. All waste arising from production is converted into reusable raw material granulate.

High-density polyethylene (HDPE) is a strong, lightweight and chemical-resistant plastic that is used not only for trailer covers but also pipes, outdoor furniture and playground equipment.

Warranty

We provide a warranty of two (2) years against cracking for E-Series trailer covers. The warranty starts from the date of purchase.

Manufacture and material

The trailer covers are manufactured in Finland using vacuum forming. Their seamless and smooth surface is guaranteed by our highly refined manufacturing and mould-making technique. The material we use is HD-PE plastic, which has proven to be the best material due to its toughness, light weight and impact resistance. Our trailer covers are UV-protected.

Considerations during use

- The trailer covers can withstand operating temperatures ranging from -40°C to $+70^{\circ}\text{C}$ and all common detergents, high-pressure washing and waxing.
- When transporting large items, always ensure that the trailer cover closes under its own weight and that the load does not obstruct its closure.
- In winter conditions, ensure that the trailer cover is not subjected to unnecessary loads due to snow.
- The trailer cover is not a load-securing device. Secure the load as you would without a trailer cover, in accordance with the trailer manufacturer's instructions.

For a wide range of uses

	Small	Medium	Large	Extra large
Length (cm)	265	300	326	350
